Colorado Legislative Session
2021 Legislation

- **Bill 21-1054** (Introduced by J. Gonzales & D. Jackson)- Criminal
  Expungement: This bill introduces a new criminal expungement process, allowing
  eligible individuals to have their criminal records sealed or expunged, depending on
  the nature of their offense.

- **Bill 21-077** (Introduced by J. Gonzales & A. Benavidez, C. Kipp)- Employment
  Eligibility: This bill amends the Employment Eligibility Verification System to
  include DACA recipients, expanding the eligibility criteria for employment.

- **Bill 21-099** (Introduced by S. Jaquez Lewis & Y Caraveo)- Department
  of Labor and Employment: This bill provides funding for the Department of Labor
  and Employment to support workforce development programs.

- **SB 21-131** (Introduced by J. Gonzales & S. Gonzales-Gutierrez).-
  Office of New Americans: This bill establishes the Office of New Americans to
  support immigrants and refugees in accessing services and resources.

- **Bill 21-1150** (Introduced by J. Gonzales & I. Jodeh).- Department
  of Labor and Employment: This bill modifies the Department of Labor and
  Employment's rules to allow for electronic submission of unemployment claims.

- **Bill 21-1194** (Introduced by D. Moreno & K. Tipper, N. Ricks)-
  Access to Healthcare: This bill proposes扩大
  access to healthcare services for low-income individuals.
21-199 (authors: S. Jaquez Lewis, F. Winter et al.; journal: D. Egar, S. Gonzales-Gutierrez). This downloadable file describes the evaluation of the impact of a new intervention on social behavior in children with autism spectrum disorders (ASD) starting in 2022. The study concludes that the intervention significantly improved social interaction skills in children with ASD, and the differences were maintained over time. The results support the effectiveness of the intervention for children with ASD.

21-1057 (authors: R. Rodriguez, J. Cooke et al.; journal: K Tipper, D. Roberts). The study investigates the effectiveness of a new therapy on reducing symptoms of ADHD in children. The results indicate that the therapy significantly reduced symptoms of ADHD, with improvements observed in both attention and impulsivity. The study also highlights the potential long-term benefits of the therapy.

21-1075 (authors: J. Gonzales et al.; journal: S. Lontine). This paper explores the relationship between parenting style and child behavior in families with children with ADHD. The findings suggest that a more authoritative parenting style is associated with better behavior in children with ADHD.

21-233 (authors: R. Rodriguez et al.; journal: C. Hansen et al.). The study examines the efficacy of a new medication for the treatment of ADHD. The results show a significant reduction in symptoms of ADHD in children taking the medication, compared to those on placebo.

21-1060 (authors: J. Gonzales et al.; journal: I. Jodeh). "U visa (U visa program for individuals who are members of certain religious groups)." The study investigates the impact of the U visa program on immigrants, focusing on the role of legal status on access to healthcare and educational opportunities. The findings indicate that the U visa program significantly improves access to healthcare and educational opportunities.

SB 21-087 (authors: J. Danielson et al.; journal: D. Moreno et al.). This bill proposes to expand the eligibility criteria for a new state-funded program to support children with special needs. The bill aims to increase access to educational and professional services for children with special needs, with a focus on early intervention and support services.

SB 21-1077 (authors: J. Cooke et al.; journal: K. Tipper et al.). This bill proposes to increase funding for research on mental health for children and adolescents. The bill includes provisions for the establishment of a mental health crisis center and the expansion of mental health services in schools.
