Notes:

¹ Some of the part of body categories shown in this table incorporate related categories from Table 4 (e.g., fingers includes thumb(s); internal organs includes lungs and heart).

² Rate is the number of injuries calculated per 1000 females employed in Colorado (the population-at-risk).

³ Rate is the number of injuries calculated per 1000 males employed in Colorado (the population-at-risk).

⁴ Rate ratio is the rate for males divided by the rate for females. A rate ratio greater than 1 means males had a higher rate than females; a ratio less than 1 means males had a lower rate than females. (CI = 95% Confidence Interval)

⁵ Total number of lost-time claims for 2009 is 26,557; eleven (11) claims were missing data for gender.
